

This document is intended to help familiarise you with the NCMAS application form only and it should not be used a reference for any rules or conditions. Screenshots may contain errors or out-of-date information. Always refer to the latest Information for Applicants document available from ncmas.nci.org.au.

To review your career profile:

- Go to ncmas.nci.org.au
- Click 'My Career Profile' – in the main menu, logging in if prompted.

- Click on the 'Edit' buttons to revise the three parts of your profile:
 - 'Career Details'
 - 'Most Significant Publications'
 - 'Last 5 Years' Publications'

To begin your application:

- Go to ncmas.nci.org.au
- Click 'Log in' – top right of screen

NCMAS 2022 - Important Dates

Dates	Milestone
18 August 2021	Applications open
5 October 2021	Applications close at 8:00pm AEDT (5:00pm AWST)
1-2-3 December 2021	Allocation Committee meeting
21 December 2021	Allocations announced
1 Jan 2022	Access to allocations commences

Participating Facilities

The following facilities are making resources available in the NCMAS 2022 call.

- NCI - Gadi
- Pawsey - Setonix
- MASSIVE

Online Information Sessions

Online zoom information sessions are running to provide background information about NCMAS. Register for the sessions here – <https://bit.ly/NCMAS2022Info>

Online Information Course

Videos and content from the online information sessions will be available through an [online information course](#) closer to the opening of the call.

This course provides an overview of NCMAS and the merit-based allocation process, and information about the changes in the NCMAS 2022 call. It also provides information on best practices and general recommendations for all applicants.

Register for the course here – <https://learning.hpc-australia.org.au/p/ncmas-2022-call>

Supporting Documentation

- [Information for Applicants](#)
- [ORCID User Guide](#)
- [Anonymisation Guide](#)
- [Sample Proposal with A3P Comments](#)
- [Sample Computational Details with A3P Comments](#)

Anonymisation

NCMAS is continuing its participation in a National Trial of Anonymising Grant Proposals from the Office of the Women in STEM Ambassador. This Trial aims to assess whether the anonymised review of allocation proposals reduces unconscious bias in STEM grant programs.

As in the 2021 round, applications for NCMAS2022 are required to be written in an anonymous third-person style (A3P).

Getting Assistance

You can request help by sending an email to ncmas@nci.org.au.

- If you do not have an existing NCMAS project at NCI (Gadi), then you will need to register your project
 - 'Create a new project'
- If you want to apply under a new project, you can also 'Create a new project'

The screenshot shows the NCMAS web application interface. At the top left is the NCMAS logo and the text "National Computational Merit Allocation Scheme 2022". At the top right, it says "Your name" followed by a "Log out" button. On the left side, there is a navigation menu with links for "Home", "FAQ", "My Application" (highlighted with a blue bar), "Applications", "Admin", "Assessments", "NCMAS Settings", and "MyNCI Home". The main content area is titled "My Application" and contains the text "No registered project has been found for which you are the Lead Chief Investigator (CI) or Delegated Lead CI." Below this text is a button labeled "Create a new project" with a right-pointing arrow, which is circled in red. At the bottom of the page, there are logos for NCRIS (National Research Infrastructure for Australia), NCI AUSTRALIA, pawsey, and MASSIVE.

- Project Overview - fill in the details for your project
 - The 'Title' and 'Abstract' you provide at this step are just part of the preliminary registration process for a new project
 - 'Abstract' is **NOT** the place to provide content from your Proposal
 - The 'Title' will appear in both the anonymised and identifiable views of your application
 - The 'Abstract' will only appear in the identifiable view of your application

The screenshot shows the 'Project Overview' form. On the left is a navigation menu with links: Home, FAQ, My Application (highlighted), Applications, Admin, Assessments, NCMAS Settings, and MyNCI Home. The main content area is titled 'Project Overview' and contains a 'Title:' label followed by a text input field. Below this is an 'Abstract:' label with a descriptive instruction: 'Summarise the aims, methodologies and expected outcomes in a few paragraphs. This is primarily an elevator pitch used in MyNCI after the merit scheme round has concluded.' Underneath the instruction is a rich text editor toolbar with icons for bold, italic, underline, strikethrough, text color, background color, bulleted list, numbered list, table, link, unlink, insert link, source code, and undo/redo. The editor area is currently empty.

- If you do have an existing NCI (Gadi) project, it will auto-fill and you can 'Start application'
 - If you have more than one, select the project you want to apply under

My Application

You can submit an NCMAS application for any project for which you are the Lead Chief Investigator (CI) or Delegated Lead CI.

Project	Lead CI	Action
Your proposal details	Your name	Start application

Create a new project → Request A3P compliance check →

* Available until 6 Sep 2021

Please note that submitting an application for an existing project is preferred as it will have a history of compute resource usage that facilitates assessment.

Terms and Conditions of Use

All users of NCI infrastructure and services agree that they will keep themselves informed of and comply with all relevant legislation and The Australian National University policies and rules, including but not limited to

- The Australian National University's Acceptable Use of Information Technology Policy
- The Autonomous Sanctions Act (2011, Cth)
- The Defence Trade Controls Act (2012, Cth)

and both acknowledge and understand that a breach of these will result in not only a loss of access to NCI resources but the user may be subject to Federal criminal prosecution resulting in fines and/or gaol legislated under the Acts listed above.

I certify that this project application does not involve any collaborators accessing the supercomputing facilities from locations outside of Australia and its territories.

I certify that this project may involve collaborators accessing the supercomputing facilities from overseas but have received advice that the use of the supercomputing facilities proposed in this project application does not require a DTCA Permit.

I certify that I have been advised that the use of the supercomputing facilities proposed in this project application may require a DTCA Permit.

Getting Started

Key Information

- *The deadline for submissions is Friday, 20 October 2024. Late submissions will not be accepted.*
- *Missing Investigator data will negatively impact assessment. A snapshot of the named investigators' personal details and career profile is taken at the moment of submission. Changes after submission will not be reflected in the assessed application.*
- For assistance with your application, contact the [NCMAS Secretariat](#).

Before You Start

1. Ask the application's named investigators to update their:
 - career profile at [My Career Profile](#) on the NCMAS website, and
 - [personal](#) and [contact](#) details in MyNCI.
2. Update your own details and career profile.

Investigators

While the Chief Investigators may be changed any time before the application is submitted, it is better to confirm them early to avoid last minute complications with breaches of the one-application-per-CI rule.

The current Chief Investigators for the project are:

Role	Name	Email	Position
Lead CI	Mark Gregson	mark.gregson@anu.edu.au	Specialist Systems Developer NCI
CI	Dr Louis Massey	lmassey29@test.nci.org.au	Lecturer Jacobson-Cunningham

[Manage memberships](#)

[Refresh](#) to make membership changes visible.

Career Profiles

Request updates from the other named investigators now if you haven't already done so. Missing or out-of-date information will negatively affect your application's assessment. Updates must be completed by each investigator at [My Career Profile](#) before application submission.

- ▼ [Lead CI: Mark Gregson](#)
- ▼ [CI: Dr Louis Massey](#)

Number of Active Users:

The total number of active people in the research group, to help assess the capacity of the group to use the requested resources.

Examples of group members considered inactive:

- members no longer using resources but with papers under review
- [members no longer working on the project but with potential for future collaboration.](#)

Resources

HPC allocations are provided in "service units" (SU) which reflect a normalised view of computing time used, priority of execution, and hardware capabilities. The baseline definition of a service unit is usage of one processor for one hour of elapsed time, at the nominal standard priority on a given system. Note that resource requests for NCMAS are quantised to kSU, that is, 1 kSU = 1000 SU.

NCMAS allocations are awarded for a calendar year and provided by the facilities in equal quarterly instalments on their target HPC systems. Non-uniform installation of an NCMAS allocation across a calendar year may be negotiated with a facility. The unused component of a quarterly allocation will not be rolled over to following quarters. NCMAS facilities are generally not able to accommodate requests for supplemental allocations due to oversubscription of resources.

Available compute systems		
System	Total Time	Min Request
Gadi	280,000 kSU	500 kSU
Setonix 2nd Request	155,000 kSU	1,000 kSU
Setonix 1st Request	100,000 kSU	250 kSU
MASSIVE	2,500 kSU	50 kSU

Please ensure that you have read the application instructions, eligibility criteria, and the lower and upper bound of the resource requests for each category in the *NCMAS 2022 Information for Applicants*.

Requested system:	Requested resource amount (kSU/year):	Delete?
<input type="text"/>	<input type="text"/>	<input type="checkbox"/>
Add		

Justification for Increased Request: (optional)
Provide an explanation for any increase compared to your current NCMAS allocation or previous request. A3P Writing Style is not required.

Format - **B I U x₂ x₃** | Source **I_x**

Utilisation of Current Allocation: (optional)
If you currently have a compute grant, NCMAS or otherwise, assess how well you have utilised the grant, discussing any impediments, including natural disasters and pandemics, that have prevented you from fully consuming the grant.

Utilisation below 90% must be justified. Assessment of NCMAS 2021 grant utilisation will be based on utilisation in Q1-Q3.

A3P Writing Style is not required.

Funding

List grants and in-kind graduate student income that end in 2016 or later.

If you are awarded an applicable research grant after the submission deadline the NCMAS Secretariat can help you add the grant to the application via an addendum.

Important: A grant may be listed if at least one CI is named on the grant. Inclusion of grants which are not attributable to a CI is a breach of NCMAS rules.

Grant categories are defined in section 5 of the Higher Education Research Data Collection specifications.

Funding Body:
 Grant ID (optional): 50 characters max. Retrieve grant data
 Delete (optional):

Add

- A new ‘Category’ has been added to the ‘Other’ funding body to allow you to add details of Graduate students that the project supports as a funding type

Funding Body Funding Body Name
 Other PhD students
 Grant ID (optional): 50 characters max.
 Funding Title: PhD student support
 Investigators: Aidan M
 Total Grant (AUD): 600000 Start Year: 2021 End Year: 2023
Category: Graduate Student
 Delete (optional):

- If you are applying again with an existing project that has an NCMAS allocation, this section will prefill
- If you are applying under a new project, but you were successful in the NCMAS 2021 round, please select the 'Prior project'
